Issuing of Letters of Intents for setting up of industries

1403. SHRI MURLIDHAR CHANDRAKANT BHANDARE:
SHRI BEKAL UTSAHI:

Will the PRIME MINISTER be pleased to state:

(a) what is the number of letters of intent issued so far for setting up of industries in sectors and areas where no licences are required under the New Industrial Policy; and

(b) what is their total production, in terms of value of goods produced per year and the quantum of different types of products manufactured per annum?

THE MINISTER OF STATE IN THE MINISTRY OF INDUSTRY (SHRI P. J. KURIEN): (a) A consolidated list indicating Scheduled Industry-wise break up of number of Letters of Intent granted prior to the announcement of New Industrial Licensing Policy under the provisions of Industries (Development & Regulation) Act, during the years 1988, 1989 and 1990 is enclosed. (*See* below) This also includes Letters of Intent for Industries which have now been delicenced.

Details such as name and address of the Undertakings, location, item (S) of manufacture and capacity in respect of all Letters of Intent issued are published regularly by the Indian Investment Centre in their 'Monthly News Letter'. Copies of this publication are being sent to the Parliament Library regularly.

The new Industrial Policy was announced by Central Government on 25th July, 1991 *vide* Notification No. S.O. 477 (E). As per the Notification, no Industrial Licence is required for setting up of industries except the industries indicated in Schedule I and Schedule II for which licensing is compulsory.

(b) A Letter of Intent is granted with an initial validity period of three years. On fulfilment of its conditions within the period of validity, a Letter of Intent is converted into an Industrial Licence. The initial validity period of an Industrial Licence is two years, within which the entrepreneur is expected to commence commercial production. However, extension in the validity period of Letters of Intent and Industrial Licences are granted by the Administrative Ministry concerned on justifiable grounds. While the gestation period for a project varies from industry to industry, it generally takes four to five years for an industrial project to fructify. As such, at this stage, it is not possible to indicate the actual total production, value of goods produced, quantum of different types of products manufactured involved in the Letters of Intent granted during the last three years.
